EXECUTIVE SUMMARY

The Sulu State College embarks its new academic year with pride and joy that we have made the year 2020 as the year of wonders and possibilities. Our year 2020 is full of inspiring and amazing stories which helped us accomplished a lot of things that contributed to our goal to excellence. The administration aims of doing more in the future that will benefit not only the institution but the province, the region and the country as well. As we envision to be the Center of Excellence in BARMM, and to successfully produce globally competitive graduates and to become an institutional steward in the development of the region, we our slowly making this all possible with all the strategies and plans that we have in mind which are translated into actions through the help of every SSCians.

As we continue to sustain the academe, we have learned methods to cope with the new normal and also continue our programs through virtual ceremonies. We successfully conducted all commencement exercises, the first virtual ceremony for the graduates of class of 2020 last June 05, 2020. The graduates and their families were able to witness this at the comfort of their homes via Facebook live. Our continuous efforts to provide avenue that will cater the student's needs including conducting ceremonies to celebrate the years of hard work during college.

Partnerships between Sulu State College and other stakeholders have never been strong as we continue to live with the coronavirus pandemic. The Sulu Airforce team distributed utilized garbage can to Sulu State College as partnership as part of sanitary projects to help lean the environment. TESDA programs which aims to strengthen the agriculture programs, envision SSC to be a trailblazer in modernizing agriculture and an effective partner in governance.

We are further empowered by our collaboration with agencies, for our main source of work lies from the needs and the demands of the stakeholders. The Sulu State College is grateful for the efforts and trust to promote the community, and the people of Sulu as one.

The Sulu State College armed with the new normal competencies, has prepared and created an online platform to make students registration for enrollment process easier and accessible, and of course the Sulu State college will always be at the forefront of the prime movers of the province. The pandemic will not hinder our endeavors towards success and productivity. Our College continued what it has been accustomed with while observing and still coped with the safety protocols for the new normal.

Just like all other institutions we have faced challenges in coping with the new normal. Seminars became webinars which made it more challenging, but with the grace of the Almighty Allah, we have successfully made it and continues to meet excellence and conducted a total of 90 online trainings and webinars via zoom meetings, and honored by the SEAMEO SEARCA for the Leadership Development Program for Higher Education Institutions in Southeast Asia.
